March 2, 2018

On behalf of the Board of Managers of TangleWood Terrace in Smithtown we would like to recognize Ed Faulkner of JEM Construction

Ed from JEM corporation has been working at our cooperative and with the cooperative's engineer in Smithtown Since 2014. To come up with the plans to address structural issues and water concerns for our three buildings. Our specific needs ranged from the foundation to the roof.

When we had financing in place in July of 2017, we decided working with Ed from Jem and having his vast experience and knowledge in commercial and residential construction made him the only company we could trust to fulfill our needs.

He was always available for questions and kept us updated frequently as to the progress of our project.

His courteous crew were neat, friendly and never stopped working

His projections came in on budget and work was completed within the projected time frame of 6 months ,even though along the way some unforeseen issues came up . But Ed work directly with the engineers to come to a quick resolution and never fell behind on the schedule.

In our opinion JEM corporation's honesty and integrity is surpassed by no other with consistency and his outstanding quality of work.
